

Supply Chain for real

CHALMERS

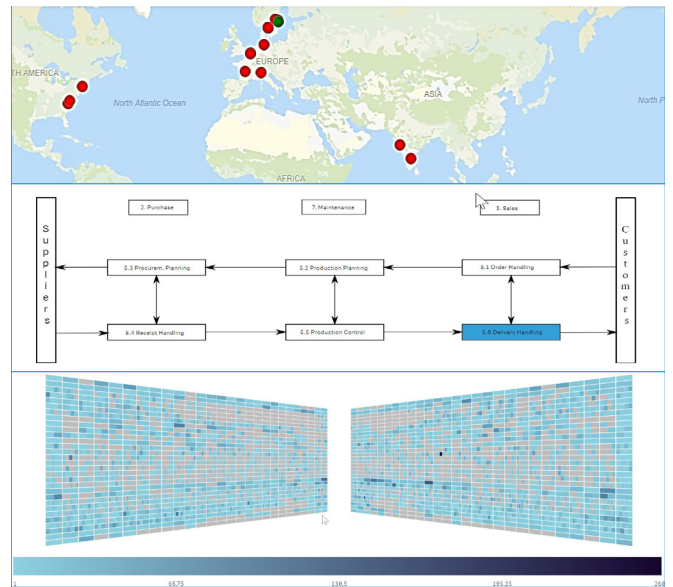

Chalmers and Meridion have conducted a study on Swedish companies' knowledge and use of their planning parameters in their business systems. In short, it can be said that many companies lack a clear and well-thought-out strategy. Also, there is room for improvement concerning the update of their basic data.

The Analysis

By analyzing and visualizing data from a customer's supply chain on a global, tactical and operational level, Meridion can promptly determine where risks and potentials for revenue exist.

Meridion can efficiently control the performance of a company and compare it with others in the industry. With this as a foundation, decisions can be made regarding operational improvements which have the biggest impact on the company.

Meridion has a global customer base with customers from multiple industries.

The Benefits

- ↓ Reduced tied up capital
- ↓ Lower planning costs
- ↑ Increase revenue
- ↑ Updated data and better understanding of the supply chain

Our offer

- 💰 Fixed price 15,000 SEK
- 🧠 We analyze your data during two days
- 👥 A joint workshop for 4 hours
 - Analysis of your data
 - Possible adjustment and updated analysis
 - Listing of improvement proposals
- 🔑 You provide access (ODBC) to your M3 database or an extract on a fileserver
