

Purchase calculation

infor M3

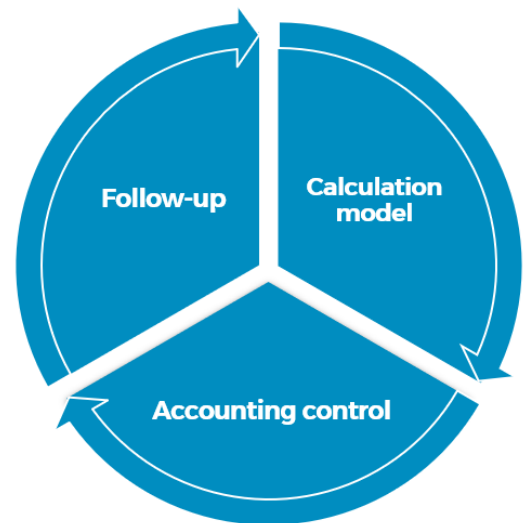

It is not common to set up a purchase calculation model that captures all the costs and even fewer have linked this to accounting control for follow-up and analysis.

Method

Meridion will show that it is not hard to follow up on indirect costs and reduce uncertainty.

We will help you in the process of developing a working method that provides accurate follow-up and an opportunity for continuous improvement.

Together we bring forward a calculation model and distribution keys for the correct allocation of costs. The next step is to connect this to the accounting control so every goods reception book is correct and we get the basis for improvements. In the third step we help you with the follow-up of real costs against pre-booked costs to update your distribution keys.

The Benefits

- ✓ Reduce uncertainty by gaining control over indirect costs
- 🔍 Customer service sees real margin when registering orders
- 📄 The marketing department gets better information on pricing and campaigns
- ✓ All departments work with the same numbers

Our offer

We adapt our offer to your situation

💰 Analyze and develop the calculation model, 2-3 days, 25 000 SEK

💰 M3 education in calculation accounting controlling and simulation of how the new model will affect margins and the result, 2-3 dagar, 25 000 SEK

💰 Three follow-up meetings to evaluate and to set the process for continuous work on updating the model, 20 000 SEK
