

Supply Chain for Real Analysis

In an extensive study conducted by Chalmers and Meridion, we have examined Swedish companies' knowledge and use of planning parameters in their ERP systems. The results show that many companies lack a well-thought-out strategy and often neglect to update their foundational data as it deserves. It's time to take control of your business systems and maximize your resources with the help of Infor M3.

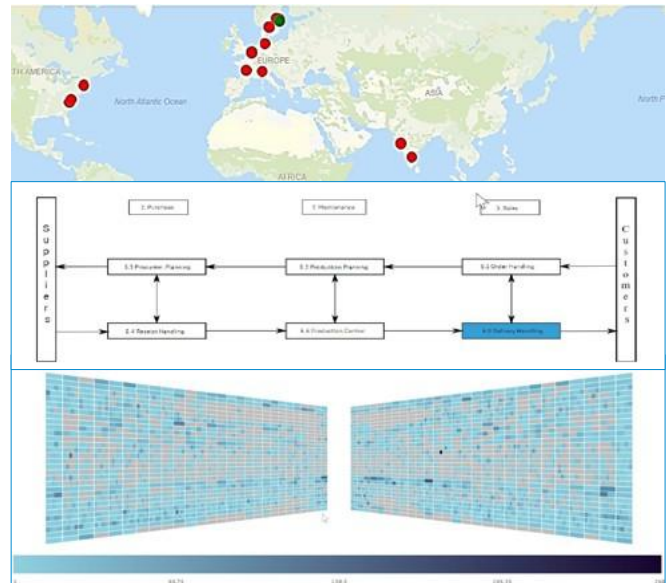

Optimize your business processes for maximum efficiency

In-Depth Analysis with Infor M3

With our expertise in ERP, system analysis, and software, Meridion is well-equipped to analyze and visualize data from your supply chain at global, tactical, and operational levels.

We quickly identify where risks and opportunities for profit exist in your value chain. By comparing your performance with other companies in the industry, we offer concrete, data driven insights that can revolutionize the way you work.

Meridion has a global customer base with customers from multiple industries.

The Benefits

- ↓ Reduced tied up material
